

In accordance with the agreement with the Manitoba Government, an Operational Stabilization Fund was established to supplement operational funding in high use years. The fund is capped at \$700,000, held in trust until needed, and may only be used to supplement operational funding.

This winter, enjoy the trails and take a moment to appreciate the clubs and volunteers whose hard work makes snowmobiling enjoyable for all of us.

Where Your
Snopass Dollars
& ORV Fee Go?

Getting this extensive trail system ready each fall and keeping it in shape throughout the winter is a huge and expensive undertaking. Operations are funded largely by the sale of Snopasses.

Snoman receives \$133.33 of each Snopass sold with the remainder of the \$150.00 fee consisting of \$10.00 going to MPI and \$6.67 for GST. When you buy your Snopass each year the money received by Snoman is deposited into an account called the SnoFund Trust.

As a dedicated fund, this means 100% of the SnoFund goes back into snowmobiling by helping to cover costs related to such things as maintaining existing trails, development of new trails, purchasing and maintaining equipment, purchasing and installing trail signs, producing trail maps as well as the administrative and insurance costs of the SnoFund program. The Snoman Board annually allocates from the SnoFund Trust to the following areas:

Insurance Fund:

Allocates dollars for liability coverage for the trails, volunteers, and coverage for Snoman.

Administrative Fund:

Covers costs such as risk management, trail audits, marketing, maintaining staff at the Winnipeg office, as well as board and committee meetings.

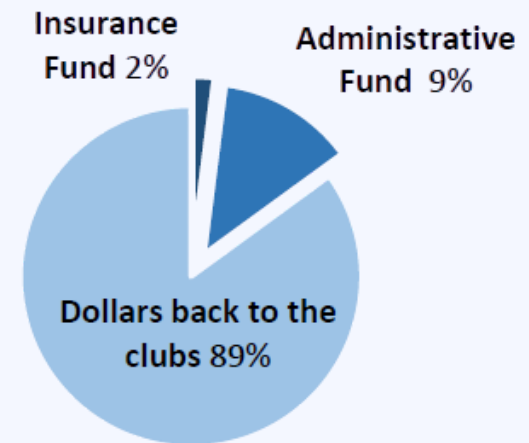

Provincial Trail Improvement Fund:

Consists of \$100,000 which is set aside annually for the purpose of trail safety and standardization focusing on signing and widening of trails. This fund is paid to the regions annually based on kilometers of trail and is up to the region to allocate the funds to its clubs.

Operational Fund:

Provides money to the clubs for the purpose of operating and maintaining the trail system including but not limited to grooming, upgrading, equipment, trail signs, club maps, etc. Snoman pays the clubs each year an amount per kilometer for trail maintenance and a per kilometer amount for kilometers clubs groom. The amount of the payout varies annually depending on the amount of funds collected though Snopass sales.

Disbursement Of Funding From Snopasses

The largest majority of income ends up in the Operational Fund.

The chart above indicates that 89% of Snopass dollars received by Snoman goes directly to the clubs. Club volunteers dedicate countless hours to provide safe and quality trails for riders across the province, made possible by the resources generated through your Snopass purchase.
